MAXDATA PRO 8100 IS

The ultimate in mobile computing

The PRO 8100 IS presents itself as the perfect high end notebook. Its high resolution SXGA+ display and top quality, high performance graphics card ATI MOBILITY™ RADEON® 9700 with 128 MB RAM provide sharp image and multimedia depiction that is rare in the notebook segment.

In this way even professional multimedia users are extremely well equipped with the PRO 8100 IS. And its integrated Intel® Centrino™ Mobile Technology also provides unbeatable WLAN quality. The owners of the PRO 8100 IS also have additional mobile benefits through a high end LAN with transfer rates up to 1 GB, battery life of four hours and Intel® Enhanced Speed Step III Power Management. And it is also fitting that the high performance notebook with all its features weighs an extremely light 2.8 kg. Such practical features as the multifunction bay and port replicator connection round off a notebook whose flexibility and performance take it to the top of current mobile computing.

Highlights:

- Port replicator connection
- Media-bay slot
- Brilliant multimedia performance as a result of advanced technology

Application areas:

The MAXDATA PRO 8100 IS, with multimedia features that are practically perfect, is the ideal solution for the professional business user.
